Sonatus Technology

The [Sonatus Vehicle Platform](#) is composed of four core products:

1. [Sonatus Foundation](#): Allows OEMs to build a dynamic vehicle software infrastructure that evolves over time through critical technologies: networking, application management, data management, cybersecurity.
2. [Sonatus Collector](#): Drive continuous vehicle innovations and quality improvement with dynamically-collected data.
3. [Sonatus Automator](#): Lets OEMs innovate throughout the vehicle lifecycle, by instantly creating new features, and streamlining vehicle testing and diagnostics.
4. [Sonatus Guard](#): Secure vehicle software infrastructure from cybersecurity threats with a multi-layer solution.

About Sonatus

Sonatus is accelerating vehicle software innovation and the transition towards software-defined vehicles. The diverse products comprising the Sonatus Vehicle Platform serve as the key building blocks that allow automotive companies and their ecosystem to fast forward to the future of mobility and deliver continuous improvements in costs, capabilities, reliability, and user experience over the vehicle lifespan. Sonatus' award-winning software platform is in mass production vehicles from Hyundai, Kia, and Genesis today and will grow to millions of cars by 2024. The company has raised more than \$110 million USD with world-class automotive, technology, and venture investors including Foxconn, Hyundai Motor Group's Kia Corporation, LG Electronics, Marvell, SAIC Capital, Translink Capital, UMC Capital, and Wanxiang Group Company. Sonatus is headquartered in Sunnyvale, CA (Silicon Valley), with offices in Detroit, Milan, Paris, Seoul, Shanghai, Taipei and Tokyo. Sonatus is a trademark of Sonatus, Inc.
